

```
UnitProto< std::vector  
< bool >, std::vector  
< bool > >
```

```
graph BT; RepetitionDecoder --> UnitProto["UnitProto< std::vector< bool >, std::vector< bool > >"]
```

A diagram showing a class hierarchy. At the bottom is a gray box labeled 'RepetitionDecoder'. A blue arrow points upwards from this box to a white box above it. The white box contains the text 'UnitProto< std::vector< bool >, std::vector< bool > >'.

RepetitionDecoder
